

Dr. Thomas Tailly

2021 Joint Spinal Cord Injury & Urology Nurse Conference

Facility/Current Responsibilities

Dr. Thomas Tailly is a Urologist-Endourologist and currently works at the University Hospital of Ghent Belgium – Department of Urology.

Experience

Dr. Tailly graduated as a medical doctor from the Catholic University Leuven, Belgium in 2007. He went on to complete his urology residency training in 2013 at the same institution. During his Endourology Fellowship from 2013 to 2015 in London, Ontario, at

Stephen Pautler and Dr. Hassan Razvi, he also finished a Master's of Science in Surgery. Afterwards he took a position as consultant urologist in the University Hospital of Ghent in Belgium. He has a special interest in urological stent and catheter design, biomaterial and coatings, uro-radiology for stone disease and training in endourology. More recently, he has achieved the degree of PhD with a dissertation on urinary stone disease.

Apart from his clinical work as endourologist, he is currently involved in clinical research on urolithiasis and its diagnostic and treatment modalities. He is part of the Young Academic Urologists and EAU section of Uro-Technology. Additionally, he is the past chair of the Young Endourological Society and he is still active in the Endourological Society as member of the research committee. He enjoys passing on knowledge and skills through courses and live surgery.

Qualifications

MD, MSC, FEBU
